Navigation Guide

Pointer to the Phase 1 review pack

Brief context for this repository in the broader Granat ecosystem. This is one of the Cone Red goodwill artefacts.

Issued

June 2, 2026

Prepared by

Cone Red Engineering

Status

Out of scope (Cone Red goodwill)

Chapter 1

Navigation Guide

Quick context for this repository in the broader Granat ecosystem.

1.1 What this repository is

This is one of the **Cone Red Phase 1 supporting deliverables** in the granat-world organization — partner-facing sites, the manifesto, and design prototypes built alongside the core platform during Phase 1.

1.2 Phase 1 acceptance status

This repository was **delivered to the Customer as-is** at the close of Phase 1. It is **outside the scope of Phase 2** and **outside the scope of the independent code review** that follows the Phase 1 acceptance act.

Cone Red provides no continuing maintenance commitment on this repository unless the Customer specifically directs that one of the supporting repositories enter active Phase 2 development.

1.3 Where to start the actual code review

The two repositories in scope for the Phase 1 independent code review are:

- `granat-world/GRANAT` — backend choir-synthesis pipeline + FastAPI service
- `granat-world/reactjs-miniapp-granat` — Telegram Mini App

The master review guide — listing all 13 repositories in the org, their attribution (Cone Red core, Cone Red supporting, Evacode predecessor), and the recommended review path — lives at:

`granat-world/GRANAT/REVIEW_GUIDE.md`

Start there.
